Christoph, unfortunately I am not sure which the 4" dimension is for in Pete's note. You send me a figure w the dimensions that you need and I will get them.

Next week we will be out there Tues AM (possibly Mon eve). I will be able to send measurements.

Steve

Do you have any dimensions for the cross section of the steel i-beams (height, web thickness, flange thickness, etc..)?

Christoph

Steel set is 8" mounting plate, 150" base to middle, 5" plate with 2, 3/4" holes . 4" wide channel iron. Please let me know if that works, thx
